Standard rolls width:	54" / 60"
Standard roll length:	20 m
Durability:	short term indoors
Storage:	cool and dry at 15-25° C, 50% rel. humidity
Shelf life:	36 months in original packing

COMPATIBLE INKS:

Eco Solvent:	yes	UVC:	yes
Solvent:	yes	Latex:	yes

Different printers, inks, resolutions and printing qualities result into numerous different printing parameters. In addition, there are numerous factors influencing processing and the application of our materials. For this reason, we cannot make specific statements as to drying times and maximum ink absorption. For this reason, we recommend you to perform own tests in order to verify the desired results. Our product specifications are not to be understood as legally binding guarantees assuring specific characteristics. Any liabilities and guarantees, as well as claims for compensation beyond the value of the product itself are excluded.

APEX PREMIUM CANVAS 410g

Description:

APEX PREMIUM CANVAS 410g is a high-quality canvas fabric. The combination of polyester and cotton ensures excellent dimensional stability of the fabric. Due to this selection of raw material, slack canvas caused by inconstant humidity is a thing of the past. Thanks to the slightly stretchy fabric and flexible coating, APEX PREMIUM CANVAS 410g can be easily applied to canvas frames with no stress whitening. The reflection-free coating on the even fabric structure makes it ideal for use in galleries. The warm white coating produces intensive colors. The APEX PREMIUM CANVAS 410g can be printed using commercial eco-solvent, solvent, latex and UVC inks.

Processing:

APEX PREMIUM CANVAS 410g can be sewed but not folded. We recommend allowing the ink to dry completely before further processing. The canvas is primarily intended for indoor use.

In order to avoid finger prints, we recommend wearing cotton gloves while using.

Application:

Typical applications are art presentations, exclusive wall decoration, photo-art-objects and art reproduction.
