

Mirror Films

MACal 1100 & 1000 Series

The brilliant choice!

The Mactac MACal 1100 and 1000 series are mirror films designed for medium-term interior and short-term exterior marking applications. They offer a unique, smooth and 'mirror-like' finish in silver and gold - visible from both sides. It means that these materials can be used when you need to add an element of glamour to glass window surfaces, and for top-of-the-range luxurious decoration.

MACal 1169 & 1179 Print & Cut are compatible with most printing platforms (solvent, eco solvent, UV, latex), and a suitable overlamine is available to protect print - especially useful when applied outside. Lean, fast and straightforward plotter cutting make these materials very easy to use, and fast weeding is possible even for small letters and fine lines.

MACal 1069-02 Silver & 1079-02 Gold are mirror-like self-adhesive films that also deliver quick and straightforward cutting with most plotters, and fast weeding including small letters and fine details.

✔ Key features

- Available in gold and silver
- Deep, appealing metal look on both sides
- Flat, stable media with excellent dimensional stability during cutting and weeding

✔ Advantages

- Trouble-free computer cutting and fast weeding, even for small letters and fine lines
- Compatible with most inkjet printing platforms (solvent, eco solvent, UV, latex)
